Re: Request for release of the Monoclinic Mine area

RECEIVED

MAR 21 2007

DIV. OF OIL, GAS & MINING

Dear Mr. Baker,

I have reclaimed the Monoclinic NOI area to the best of my ability due to past mining activity operations Reclamation was completed in 2004 and it was inspected.

I completed all requests to further reclamate this area including roughing the area up and reseeding again in 2005.

Two growing seasons have passed and very little growth of vegetation has happened probably due to no topsoil was saved thru prior mining operations.

Therefore I am requesting a release of this area.

With the divisions approval I personally would like to continue watching this area and if I can obtain extra topsoil from other projects spread it in this area and seed it again I do live on the adjoining land and would like the area to look good. Altho I feel I should be legally released from the obligation.

In the past I have taken it on myself to reclaim/contour an area that was just left by Vision 1 at my own expense to insure the surrounding area of my home is not left a mess.

I look forward to working with you and DOGM in the future.

Thank You,

  
William Harrison
